Looking for a suitable position in the field where my skills and abilities would undoubtedly prove myself as an asset for any organization. The job I seek should contain prospective growth according to my competence.

Experience

STYLE TEXTILE PVT LIMITED

21th August 2015 – 30th May 2016

Lahore

Style Textile is one of the world's leading textile and apparel manufacturer in Lahore dealing with world famous brands including Nike, Adidas and Reebok.

I worked as an Environmental, Health and Safety Specialist at Style Textile. Responsibilities include

- Operation and maintenance of Effluent Treatment Plant (Activated Sludge System) with a capacity of 42Kilo Liter/hour.
- Monitor the parameters like pH, color, BOD, COD and temperature at different stages of ETP.
- Carry out the sampling activity for the analysis by SGS Pakistan for the compliance of NEQs.
- Developed Annual EHS training plan and delivered trainings to staff, workers, contractors and security guards.
- Conduct various surveys like Ergonomics and Personal Protective Equipment's for better health of employees.
- Inspecting the entire work site on a continuous basis, making on the spot corrections of unsafe acts of the workmen and taking suitable steps to eliminate all the unsafe conditions.
- Coordinate and participate in the investigation of accidents and near misses.
- Effective implementation of work permits system at the facility.
- Conduct internal HSE & Compliance Audits & moreover prepare and represent Factory in external Audits.
- Maintain safe workplace for workers by conducting risk assessments.
- Coordinate with department heads for implementation of HSE.
- Update the Corrective Action Plan and Factory Improvement Plan of the facility on monthly and quarterly basis respectively.
