## Why *Shaheer*?

- Conversant, innovative and level-headed Electrical engineer possessing strong technical acumen and extensive knowledge of electrical control systems, fluid & Power system and industrial electronics. Resourceful individual having insights to equipment inspection & maintenance, instrumentation including resolute troubleshooting skills; eminent in communication and presentation
- Meticulous innovator, offering robust analytical skills with strong technical and methodical aptitude. Having flair to utilize variety of techniques in installation and repair of electrical components; equipped with relevant engineering and commercial skills to assist organizational targets. derive project and planning goals.

## CORE STRENGTHS & ENABLING SKILLS

- Manufacturing Processes
- Power Generation
- Inspection & Troubleshooting
- Circuit Designing
- Motors Winding
- Electrical Maintenance
- AutoCAD
- MATLab

## PROFESSIONAL EXPERIENCE

### Pakistan Railways, Lahore, Pakistan

Worked as "*Intern*", June 2015

### Responsibilities/Accomplishments:

- Effectively assisted department head in troubleshooting of production Units and quality assurance of Electrical parts. Analyzed performance of existing plants and devised techniques to increase power production.
- Prepared technical report for Railway site on all days during visits; assisted in conducting performance survey and maintained plant-systematic database for department.

## PROFESSIONAL QUALIFICATION

- **University of Lahore, Pakistan** (2012 – 2017)  
B.S – Electrical Technology
- **Final Year Project**  
'Prepaid Energy Meter'

### Major Subjects:

- Power Engineering
- Microprocessor Theory & Interfacing
- Circuit Design
- Control System
