FINAL YEAR PROJECT AND SEMESTER PROJECTS

FYP	<p>"Voltage and Frequency profiling using Induction Generator" Our research work investigates the use of asynchronous generator for production of electric power in Micro-Hydro Station where the prime mover is unregulated. Low cost, less maintenance, robustness, smaller size and weight are the main advantages of asynchronous generator.</p> <ul style="list-style-type: none">• Metal Detector• Automatic door lock system using Arduino.• Analog to Digital Converter.• Water level indicator• Security Alarm system.
